

Properties of 304/316 steel (similar to V2A/V4A steel)

Stainless Steel Cable Ties can be used at temperatures up to 538° C.

Stainless steel cable ties				
Material	Chem. Material Properties*	Operating Temperature	Flammability	
Stainless Steel Type SS304 (SS304)	- Corrosion resistant - Weather resistant - Outstanding chemical resistance - Antimagnetic	-80 °C to +538 °C	Non burning	
Stainless Steel Type SS316 (SS316)	- Salt spray resistant - Corrosion resistant - Weather resistant - Outstanding chemical resistance - Antimagnetic	-80 °C to +538 °C	Non burning	
Material	Chem. Material Properties*	Operating Temperature Tie	Flammability Coating	Operating Temperature Coating
Stainless Steel Type SS316 (SS316), Polyester (SP)	- Salt spray resistant - Corrosion resistant - Weather resistant - Outstanding chemical resistance - Antimagnetic	-80 °C to +538 °C	Halogen free	-50 °C to +150 °C

*These details are only rough guide values. They should be regarded as a material specification and are no substitute for a suitability test. Please see our datasheets for further details.

Metal Banding for Heavy Duty Application

• AMT-Series

Features and Benefits

- Five lengths of band are available 500, 600, 800, 1000 and 1500mm
- Single width – 16mm
- Light Duty (0.4mm thickness) and Heavy Duty (0.75mm thickness) available
- Double Band versions available for extra heavy-duty applications
- LFPC163 protective channel available in 1 meter and 25 meter lengths to cut to size

AMT Ties with and without protective LFPC channel.

Application

The AMT tie is designed for heavy duty application. The folding mechanism, which ensures tight locking, will not become loose under vibration conditions. Therefore in all safety relevant areas where vibration is normal, like in the Rail, Ship or Construction Industry this product is very suitable.

The high strength banding system - AMT Ties.

Cable Ties with Ball-Lock

• MBT-Series

Features and Benefits

The MBT (Metal Ball bearing Ties) have a non-releasable locking mechanism that offers infinite adjustment along the length of the tie. These ties are available in both 316 and 304 grades of stainless steel.

Application

The MBT range of stainless steel ties are suitable for use in the most arduous conditions or where additional security, strength, fire resistance and chemical resistance properties. Used in all industries - from mass transit, ship building, oil rigs, mining, chemical industries and many more.

Double Band Cable Ties with Ball-Lock

• MBTXHD- / MBTUHD-Series

Features and Benefits

The stainless steel MBT-ties with double band operation can be wrapped around the bundle and inserted into the head twice. By this feature the metal tie reaches a very high tensile strength to carry enormous applied loads.

To resist even special demands the metal tie comprises a head with two balls for locking.

Application

The double band ties of the MBT-series are used in applications where a fixing requires an extraordinary high tensile strength.

Cable Ties with Ball-Lock and Coating

• MBT-FC-Series

Features and Benefits

The fully coated cable ties of the MBT-series are made of stainless steel SS316 with a polyester coating.

The coating offers various advantages:

The cable tie has smooth edges. The handling and the installation is more comfortable.

In the application contact corrosion will be avoided.

Application

Stainless Steel cable ties with polyester coating provide a comfortable installation, especially when using outside at low temperatures.

These products are chosen when a high tensile strength is demanded and a sensitive harness requires a carefully bundling.

Cable Ties with Fold Locking

- MLT-Series
- MLT-C

Features and Benefits

The MLT ties are a heavy duty type 316 stainless steel, once installed they can be opened and re-used if required.

These Metal ties are available with and without coating.

Cable Ties with Raster Locking

- MAT-Series
- MAT-C

Features and Benefits

The MAT ties are similar in design to conventional 'plastic' cable ties and work on a ratchet system. Available in type 316 stainless steel.

Stainless Steel Cable Ties can be used at temperatures up to 538° C.

Protective Channel for Stainless Steel Ties

• LFPC

Features and Benefits

Manufactured from Polyolefin the LFPC channel is a Halogen free material which is flame retardant. Covering the underside and edges of the MBT ties to give full protection to the cable bundle.

Application

When used in conjunction with the MBT range of stainless steel cable ties this channel gives the cable protection against chafing, vibration and shock. Ideal for use in arduous conditions such as those found on board ships, oil rigs or in nuclear power stations.

Cable tie MBTXH with LFPC Protective Channel.

Material Data	
Material	Polyolefin (PO)
Colour	Black (BK)
Operating Temperature	-40 °C to +90 °C
Flammability	Limited Fire Hazard, Low generation of toxic gases and corrosive acid, Low smoke generation
Specification	London Underground RSE STD 013, DEF STAN 61-12 (Part 31)

LFPC
